

eDynamic package based on eCMS - Content Management System for Company Website

eCMS Website Publisher is a powerful web content management system built in the eCollaboration tool as an optional module or a separate Publisher making web content easy to be published.

It is easy-to-use web-based tools empower content authors to manage complex websites, intranets and extranets, at the same time alleviating the strain on IT resources.

This package includes:

- Your domain name (.com, .org, net) reserved for one year (if it is free) we do not yet provide automatic reservation for .JO domains.
- The hosting of your website on our servers in Europe in our datacenter based in Belgium.
- Your E-mails based on your Domain and hosted on Google Mail platform.
- Two (2) Administrator User to manage the content of your website
- Hosting of One Website (the system supports more than one website per company – Just ask for more info about this)
- One day training in our premises for the Content Manager of your company
- Our team will create the first template based on your need – We provide you with samples of templates – you can choose from templates. We can create a specific template for you – based on your requirements we will provide you with a quote for a new template.
- We will create you 3 pages based on the template
- The system has not limits for number of pages
- It will take between 2 days and 2 weeks to create your website depending on your requirements.
